Laporan Tugas Sistem Operasi instalasi PROXMOX;

1

Proxmox Virtual Environment (PVE)

The Proxmox Installer automatically partitions your hard disk. It installs all required packages and makes the system bootable from the hard disk. All existing partitions and data will be lost.

Press the Next button to continue the installation.

- **Please verify the installation target**
The displayed hard disk will be used for the installation.
Warning: All existing partitions and data will be lost.
- **Automatic hardware detection**
The installer automatically configures your hardware.
- **Graphical user interface**
Final configuration will be done on the graphical user interface, via a web browser.

Target Harddisk:

2

Location and Time Zone selection

The Proxmox Installer automatically makes location-based optimizations, like choosing the nearest mirror to download files from. Also make sure to select the correct time zone and keyboard layout.

Press the Next button to continue the installation.

- **Country:** The selected country is used to choose nearby mirror servers. This will speed up downloads and make updates more reliable.
- **Time Zone:** Automatically adjust daylight saving time.
- **Keyboard Layout:** Choose your keyboard layout.

Administration Password and Email Address

Proxmox Virtual Environment is a full featured, highly secure GNU/Linux system, based on Debian.

In this step, please provide the *root* password.

- **Password:** Please use a strong password. It should be at least 8 characters long, and contain a combination of letters, numbers, and symbols.
- **Email:** Enter a valid email address. Your Proxmox VE server will send important alert notifications to this email account (such as backup failures, high availability events, etc.).

Press the Next button to continue the installation.

The screenshot shows the 'Administration Password and Email Address' step of the Proxmox VE installation. It features three input fields: 'Password' (masked with dots), 'Confirm' (masked with dots), and 'Email' (containing 'traa55641@gmail.comSSS'). At the bottom right, there are 'Previous' and 'Next' buttons.

4

Management Network Configuration

Please verify the displayed network configuration. You will need a valid network configuration to access the management interface after installing.

After you have finished, press the Next button. You will be shown a list of the options that you chose during the previous steps.

- **IP address (CIDR):** Set the main IP address and netmask for your server in CIDR notation.
- **Gateway:** IP address of your gateway or firewall.
- **DNS Server:** IP address of your DNS server.

The screenshot shows the 'Management Network Configuration' step. It displays several configuration fields: 'Management Interface' (a dropdown menu showing 'enp0s3 - 08:00:27:cd:60:2f (e1000)'), 'Hostname (FQDN)' (containing 'purbaya.id'), 'IP Address (CIDR)' (containing '182.168.1.200' and a netmask of '24'), 'Gateway' (containing '192.168.1.1'), and 'DNS Server' (containing '8.8.8.8'). At the bottom right, there are 'Previous' and 'Next' buttons.
